## **Project Idea :-**

- ❑ Online furniture store for the sale of various pieces of furniture.**
- ❑ The project aims to help people more in choosing home furniture by displaying the product in front of them in an augmented reality and seeing the result of furniture compatibility with home decor**
- ❑ The most important feature in the store is the possibility of displaying products in augmented reality in the environment.**
- ❑ The idea of displaying the furniture product in the form of augmented reality will increase the development and importance of websites and keep pace with the new era of technology**

## **Components of the project :-**

- 1- Database to Store all the furniture products and user profiles**
- 2- Cross Platform Mobile App to display the products by using AR**
- 3- Cart for customer to hold his products before buying**
- 4- Fav page for customer to hold his Favorite products**
